### AutoCAD Crack Free Download [Win/Mac]

AutoCAD Serial Key makes it simple to lay out a 3D space around objects in an easy, intuitive manner.

It is used to create a wide range of 2D drawings, such as engineering and architectural drawings, as well as complex 3D models. Price: Starting from \$2,695 Rigid body: Yes Ray tracing: Yes Accelerated: Yes AutoCAD LT is a version of the full-featured AutoCAD, available in the Essentials and Professional editions. Price: Starting from \$699 Rigid body: No Ray tracing: Yes Accelerated: No Accelerated file formats: .rfa, .rif, .rad Vector image formats: .ai, .eps, .pdf, .svg 3D model formats: .dxf, .igs, .mod, .stl

AutoCAD NX (NX) is a cloud-based collaborative software application designed to build digital prototypes, simulation models and visualization applications. AutoCAD NX provides the ability to view the project from multiple angles and user interactions are supported through the integration of webcam and gestures. Price: Starting from \$9.99/mo Rigid body: Yes Ray tracing: Yes Accelerated: Yes

AutoCAD Map 3D is a 3D mapping software application that provides 2D and 3D creation, information and collaboration. It has global map functionality, editing of Map Viewer content and 2D/3D tile display. It can use Google Maps, Bing Maps, Esri and Adobe Map Suite (ATS) for online rendering and data integration. Price: Starting from \$1,000 Rigid body: Yes Ray tracing: Yes Accelerated: Yes Stereographic: Yes Scale: Yes Google Earth Engine is a cloud-based platform that enables anyone to create, share and analyse Earth-observing data. It provides online 3D and 2D viewing, digital terrain and satellite imagery, and lets users make 3D models, animations and music and games. Price: Starting from \$9.99/mo Rigid body: Yes Ray tracing: Yes Accelerated: Yes Stereographic: Yes SketchUp is a free, web-based

AutoLISP - a programming language designed to enable engineers to extend AutoCAD. It supports double-clicking in the drawing window and its palette, and the use of an extension, New AutoLISP Extension, allows new language features. AutoLISP is still widely used today. Visual LISP - A simple language created by John Fremlin, which is similar to other modern programming languages such as Ada, and COBOL. Visual LISP is still included with AutoCAD and can be used in both AutoCAD and AutoCAD LT. VBA - A .NET-based programming language, now Microsoft Visual Basic for Applications (formerly Microsoft Visual Basic for Applications Extensibility (VBA-X)) VBA is a 32-bit programming language which allows a user to automate AutoCAD from within AutoCAD by adding, modifying, and deleting AutoCAD objects and data, and to automate AutoCAD from a custom application with minimal programming by modifying the AutoCAD Object Manager. DotNetX - a Visual Basic for Applications (VBA)-based extension to Microsoft AutoCAD. AutoLISP Plugins - The ability to write macros for AutoLISP allows AutoLISP to extend AutoCAD. Dynamic Input - The ability to dynamically input information into AutoCAD (such as position of an object) from an external application. Custom Commands - The ability to run a custom command other than the default, such as the ability to use custom commands in a PostScript file. PostScript - The ability to generate PostScript files. AutoCAD LT requires that PostScript files be installed. PDF - The ability to generate PDF documents. IRX - Interactive Report Exchange - The ability to exchange information with third-party Microsoft Office Reporting Services (IRX) compliant applications. The use of IRX is not required for AutoCAD; however, some functions such as e-mailing a report may only be available via IRX. PKEY - The ability to import and export parameters. DXF - The ability to export or import drawings in the DXF file format. NET - The ability to interact with the AutoCAD application using .NET technology. Database Driven - The ability to create a database-driven application. Web Services - The ability to call a web service. Others (e.g., AX, MDX, HTML) - Support for a number of other file ca3bfb1094

### What's New in the?

Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. (video: 1:15 min.) New tools for markup Assist: Use the new Markup Assist to quickly find the correct information in multiple drawings, even with multiple edit masks or nested drawings. (video: 2:35 min.) Use the new Markup Assist to quickly find the correct information in multiple drawings, even with multiple edit masks or nested drawings. (video: 2:35 min.) The new streamlined markup features are intended to give you a faster workflow while making it easier to build useful feedback. For example, you can search for a component in multiple drawings in a second or export more complex feedback into other files. Added a new default marking color scheme for marking symbols. Changed the lighting/material settings in the [Environmental] | Lighting and Materials dialog box. Changed the animation preview feature in the [Animation] tab of the [Map] dialog box. User interface and tool improvements: Support for the active feed item by pressing the spacebar and arrow keys, as well as shift-arrow keys and shift+spacebar. Support for the active feed item by pressing the spacebar and arrow keys, as well as shift-arrow keys and shift+spacebar. The [Smart Guides] | User Interface and Navigation dialog box now includes a My Autodesk Collections sub-menu to make it easier to customize the layout of items. The [Smart Guides] | User Interface and Navigation dialog box now includes a My Autodesk Collections sub-menu to make it easier to customize the layout of items. To scroll through the [Smart Guides] | User Interface and Navigation dialog box, click the Expand All button. The [Smart Guides] | User Interface and Navigation dialog box, view, and tab options now are always on top of the rest of the dialog box items. The [Smart Guides] | User Interface and Navigation dialog box, view, and tab options now are always on top of the rest of the dialog box items. The [Smart Guides] | User Interface and Navigation dialog box is now consistently sized with the current view size. The [Smart Guides] | User Interface and Navigation dialog box is now consistently sized with the current view size. To view the tab list, you can now click the plus/
