■ The New Fantasy Action RPG Adventure System Feast your eyes on the beloved class-and-job systems of fantasy RPGs of old. The new action RPG adventure system gives you a greater level of freedom, and also lets you freely choose your class and job. [CLASS AND JOB] The New Class-and-Job System The new class-and-job system lets you freely exchange class and job, but it also gives you a powerful system for customization. Your class and job will greatly influence your character. ■ Special Characters and Unique Weapon and Armor Effects You can select up to two special characters. The selected special characters can be obtained through in-game events, collecting game items, or even as separate DLCs. Once obtained, these characters will faithfully follow your commands. You can also use the special characters' skills in tandem with your own. The special characters (and their skills) will each impart their own unique attributes and effects onto your weapons and armor. Once equipped, they can be used in conjunction with your class and job to give you a powerful weapon or armor that is sure to impress your opponents. ■ The Postman, the Thief, and the Wizeden Wizard When you wish to make a daring, single-turn-kill attack, the postman can unleash his speed at the cost of his life. The thief can ambush his prey from behind, swiftly slashing them with his rapier. And the wizeden wizard can cast powerful magic that will devastate his enemies. [ACTIONS] The New Action RPG Mode A Grand Battle Experience The action RPG mode is a new class-and-job system that lets you freely exchange class and job. It also features a brand-new action mode for large battles. ■ The action RPG mode has three battle styles. Chamber Battle - The Chamber Battle is a battle style that has the Action and Melee characters in the same party. Players can command and use the monsters that appear in the party to defend themselves. However, if a party member moves around the monsters attacking from behind or above, it will cause the party to lose control of the action. Group Battle - The Group Battle is an action battle style in which the chamber battle style features an enhanced version of the boss battles in the action RPG mode. Therefore, the monsters will appear with their own skills, and the players will have to make the right use of the monsters' abilities. Party Battle - The Party Battle is an action
