As seamless as Photoshop on a Mac truly is, it's available on Windows PCs as well. The latest version, Photoshop CC 2019, runs on well-supported Windows 7, 8, or 10, and provides a selection of high-quality native apps for Windows devices, including large-screen tablets, such as the Surface Pro and Surface Pro 2. This is true for both 32- and 64-bit versions of the software, although again, older Mac OS versions may find support lacking, depending on what specific "feature support" errors they encounter.
